

RAS Site Safety — Database ERD

SQLite Durable Object · 9 STRICT tables · PK = primary key · FK = foreign key · crow's foot = many · circle = optional · bar = exactly one

SUPPORTING TABLES · NO FOREIGN KEYS

app_metadata		
PK	key	TEXT
	value	TEXT

upload_staging_chunks		
PK	upload_id	TEXT · 43 chars
PK	photo_index	INTEGER · 0-4
PK	chunk_index	INTEGER · ≥ 0
	bytes	BLOB · ≤ 1 MiB

Rules

- One submission per worker, site, and date: UNIQUE (worker_id, site_id, work_date).
- Each submission has 1-5 photos. Originals are split into chunks of at most 1 MiB.
- Deleting a photo cascades to its photo_chunks and photo_thumbnails rows.
- upload_staging_chunks holds an upload only until it commits or fails.
- app_metadata stores the bootstrap marker and schema_version = 3.

Indexes

- photos_submission_id_idx · sessions_user_id_idx · sessions_expires_at_idx
